

The OSHA Hazard Communication Standard only requires MSDS's and special labeling for materials defined as "Hazardous" at 29 CFR 1910.1200 (c). Since the products do not meet this definition, they do not require special labeling or MSDS's. Additionally, the ingredients of these products are not listed as "toxic" at 40 CFR 372.65 (SARA Title 111), nor do they contain any "toxic" materials in excess of "de minimis concentrations" as defined at 40 CFR 372.38 (a). However, we provide MSDS's as information items for our customers.
